

The Construction Link presents  
**YOUR TOTALLY INTEGRATED  
SOFTWARE SYSTEM**  
for controlling costs, labor, materials  
and workflow to increase profits and  
**WIN MORE BIDS.**

# FAST. EASY TO USE. PROVEN.

The Construction Link Estimating System™, developed by a contractor for contractors, is based on over 25 years of real-world experience in construction bidding. It features a virtually unlimited rate library for labor, equipment, rental, subcontractor, materials, "other" and crews where users can store commonly used cost items. Bid items can also be quickly assembled using the library or can be copied from previous projects. Job overhead, markup and profit percentages are entered in the system and balanced bid unit prices are calculated by the program. Comprehensive reporting allows the system to analyze the cost at both the summary and detail level.

- From HQ estimating to field site management to project billing.

- Designed and built by a contractor for highway construction contractors.

- Estimating Link quickly determines estimated cost on unit price basis and applies your markup strategy to win the bid.

- Billing Link tracks all your quantities, your subcontractors' quantities and produces periodic estimates.

- *New Field Link* tracks labor and equipment operating time in a field-friendly electronic time sheet at multiple sites with point 'n click simplicity.

- *Put the complete solution to work for you.*

Introducing

# new FIELD LINK

Real-time project intelligence to keep jobs on track, on time and on budget.

## Field

### Time cards

Track standard and overtime labor hours.

### Materials

Keep track of unit costs versus original estimate.

### Equipment run times

Track operating time and idle time.

### Daily quantities

Interface directly with Billing Link or use it for simple daily tracking.

### Project tracking

Time sheets and quantity entries summarized for the project.

As an integrated part of your project management procedures, Field Link pays you dividends every day. It can help identify and pinpoint problem areas on every job in your operation and, more importantly, give you the information you need ... when you need it ... to address them **quickly** before they turn into cost overruns and project headaches.

## FIELD LINK

Field Link provides daily feedback on multiple job sites and can give you consolidated reporting with in-depth drill downs on hours, unit costs, quantities, etc.

new HOT LINK

Use the power of the Internet to manage all your projects with reliable up-to-date information. With our high-speed, secure Internet connection—Hot Link—you can automatically update the office with the latest activity from the field and receive the newest rate cost information. Plus, get real-time upgrades that incorporate the latest software features.

## Office

### Project Tracking

Keep track of all your projects with one clear overview.

### Time sheets

No bothersome paper time sheets. Links to accounting and payroll.

### Variance

Know where you stand on every job by comparing estimate to actual costs.

### Drill down

Clearly compare job status to original estimate and point out any trouble spots.

# Construction Link Pricing Schedule

(effective 10/1/02)

**Field Link—  
field tested by real  
customers like you.**

New Field Link software gives me total control over time sheet tracking. It provides the person responsible with the information to end project speculation by identifying problem sources quickly. It also has an excellent, accurate reporting feature for field or office. This product is a real time and money saver!

John Hildemann  
InterCounty Paving Company  
Project Manager

See for yourself how easy Field Link project management software is to use ... and how it can start saving you time and money from day one. Go to our website at [www.tcli.com](http://www.tcli.com) and try our free demo and prove it to yourself. Plus, all our software is backed by a 90-day money-back guarantee—so you have nothing to lose. But a lot to gain—fast, accurate job tracking, improved cost control, preserved markups, timely fact-based project management and more winning bids.
